Security Clearance: Secret (Active)

PROFILE

A dedicated *Full Stack Web Developer* delivering robust internal and client facing desktop and web applications built in the .NET framework and whose excitement for Javascript has led to a great appreciation for technologies such as Vue.js and Typescript.

TECHNICAL SKILLS

Proficient	Javascript	Typescript	Vue.js	Node.js	PostgreSQL	Git	C#	CI/CD
Familiar	MongoDB	React.js	ASP.NET	Python	Redis	Azure		

WORK EXPERIENCE

Web Developer (Part-Time) *ABC Healthcare* | Beltsville, MD | January 2023 - Present

Deliver new features for and maintain a *RESTful* progressive web application, built in *Vue.js*, for a regional home healthcare organization to manage employees' working hours and communicate proper care plans between the healthcare professional and caretaker.

- Developed the Google Geolocation + Places API location capturing and distance enforcement feature.
- Integrated *JWT Authentication* for user sessions.
- Set up *CI / CD* pipelines deploying to an IAAS provider.
- Created E2E tests to run with *Cypress*.

Application Support Engineer *Casepoint* | Tysons, VA | August 2022 - Present

Build internal and client facing desktop applications, extend the current functionality of the platform, generate organization-wide reports exported from a PostgreSQL database, and provide quick development deliverables.

- Built a desktop application in .NET to expose non-Casepoint system fields from PostgreSQL databases to allow clients with SQL knowledge to execute asynchronous queries and perform reporting otherwise not possible through the web application.
- Developed a client-facing desktop utility in C# to extract masked hyperlinks from various file types into a .csv file.
- Maintained an internal knowledge base to provide my team documentation regarding tools and utilities developed by me and frequently used SQL queries.

DevOps Engineer *Casepoint* | Tysons, VA | August 2021 - August 2022

Streamline sprint release and daily hotfix deployments for the Casepoint Gov environment, collaborate with various development teams to optimize existing CI/CD processes, and verify the integrity of deployments by performing regression testing for all modules within the platform after each deployment.

- Reduced deployment errors by 25% through effective reporting, emphasizing actionable improvement points to infrastructure and development teams.

Associate eDiscovery Data Analyst *Casepoint* | Tysons, VA | August 2020 - August 2021

Import and export data in accordance with standard eDiscovery practices into and out of a PostgreSQL database so that users may perform analytics, prepare production packages used in the clients' litigation matters, develop efficient workflows, and provide thorough quality control through the Casepoint platform.

- Trained over 15 data analysts in 7 days to fulfill error-free data migration activities for the *SEC: Recommend to Casepoint Migration* project.
-

EDUCATION

Bachelor's in Business Administration: Computer Information Systems

Pittsburg State University | Pittsburg, KS | 2015 - 2019
